Gentlemen:

REFERENCE: ID No. PAD004338000

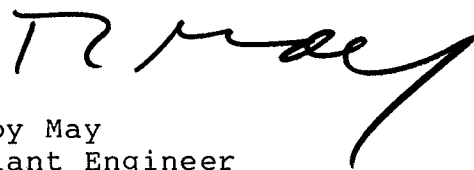

65-18645

In order to comply with EPA Regulations 40CFR280 and 281 concerning underground storage tanks, the Jeannette plant of GenCorp Polymer Products is planning to eliminate existing underground bulk storage of process liquids. To do so, we propose to build a containment structure to house a new group of above-ground tanks.

Please send to me the appropriate registration forms for new above-ground storage tanks.

Yours truly,

GenCorp Polymer Products

Roy May  
Plant Engineer
